I. Introduction

The City of Gastonia, NC (City) is now accepting proposals from interested and qualified firms, vendors, and/or contractors for the design and installation of Audio Visual Systems for the Snyder Place Phase II Renovation Project located on Snyder Place in Gastonia, NC.

II. Project Background

The City of Gastonia is renovating the 151 Snyder Place facility. The project includes a training room (approximately 47' x 29').

Please refer to Exhibit B for room layout information.

III. Summary

The City of Gastonia is soliciting proposals for all audio/visual needs for use in 151 Snyder Place within the training room. Proposals should include equipment (including AV equipment cables), installation, and the first year of support services. All proposals must also include warranty of products and workmanship. Vendors are required to quote equipment that is a current model and still supported by the manufacturer. Equipment that is approaching end of life/sale/support will not be accepted. Initial training on usage of the solution for a group of approximately 5 key staff should also be included. Installation shall commence only upon written confirmation from the City that structural and finish renovations in the Training Room are substantially complete.

necessary to the functionality of the vendor's proposal. Wireless microphones are to be included as part of the AV solution. Vendor is required to install all proposed equipment. The first year of maintenance and support should be included in the installation price. Please provide pricing for future years of service.

Any equipment installed on walls or ceilings must be properly installed and supported in studs or with the appropriate braces for the weight of the equipment.

The City requires the vendor to assign a single Project Manager (POC) who will serve as the primary point of contact for the duration of the project and warranty period. The City will agree on a timeline with the POC of the awarded vendor. Impact on other operations in the building must be minimal.

The vendor must schedule product delivery and plan installation operations accordingly. Once the project is complete, the system must be up and running 99.99% of the time. The vendor's response time for service is critical. Each vendor should specify their response time to service requests; vendors may want to specify potential differences for work that can be performed remotely as well as in person service calls during standard hours, after hours, weekends, holidays and when activated during events. All proposals should specify if any components of the solution are proprietary. The City is open to proprietary solutions; however, more flexible solutions will be scored higher.

Proposals should include a proposed timeline specifying proposed work benchmarks if your organization was awarded the contract—including, but not limited to, the following: contract execution, order equipment, begin installation, anticipated completion date, training date, etc.
